

# Co-creating Inclusive Futures For All

Simplifying access to services needed  
for successful societal integration

**easyRights** is a new initiative to help local government and (im)migrants co-create digital solutions that simplify access to public services.

Migrant integration currently takes between 11 to 20 years to reach parity. Harnessing the power of AI to improve personalisation and contextualisation of existing services to better match migrants' backgrounds aims to reduce this figure dramatically and ensure faster integration and social cohesion.

Sign up to easyRights as a volunteer, test our tools and make life easier for all.

Thank you.
